### Wanderlust [Live Demo](#)

WanderLust is a full-stack MERN web application inspired by platforms like Airbnb. Users can explore, create, edit, and manage travel stay listings with category-based filtering, secure authentication, and map integration. The application focuses on responsive design, RESTful APIs, and a seamless user experience across devices.

### Mental Health Support Platform (Mantra) [Live Demo](#)

Built a full-featured mental health web platform using React.js, Node.js, and MongoDB. The platform follows a component-based architecture and includes user authentication, dynamic data rendering, and smooth UI interactions using React Hooks, Context API, and Framer Motion.

### Portfolio Website [Live Demo](#)

Designed and developed a personal portfolio website using HTML, CSS, and JavaScript. The website showcases projects, skills, and contact information with a clean, responsive layout and modern design principles.

### Mini Message Box

Developed a lightweight real-time messaging interface using Node.js, Express.js, and MongoDB. Implemented message storage, user input handling, and instant message rendering to simulate a simple chat environment with smooth and responsive interaction.
